ACW

Updated as of May 2023

ACW Distribution (HK) Limited is a Value-Added Distribution corporation for leading Enterprise Solutions in the Asia-Pacific region since 1986. We create IT solutions by integrating the “Best-of-Breed” products in the market and delivering them to the end user via an extensive network of trained and certified channel partners in the region.

ACWdistribution
a member of **ACW** Group

Our Mission

To be a professional solution-orientated marketing and distribution company as well as to bring the latest concept and trends in IT, we assist small and medium enterprises to sizeable businesses to enhance operational efficiency and profitability. We strive to provide Value and Quality Service in the form of technical consultancy, effective marketing and distribution to our reseller partners.

Our Technical Expertise

We are all sales, marketing and technical professionals with fruitful experience and qualified knowhow.

Our Professional Services

You can find a wide range of services for our customers, from basic implementation service from us to professional consultation services. We also offer a comprehensive portfolio of technical training courses for you. Moreover, if standard training courses do not fit your company, we could customize for your requirements.

We offer various IT products including:

Information Security

Network and Connectivity

Enterprise Solutions

Data Management

WE CREATE IT SOLUTIONS BY INTEGRATING THE BEST OF BREED

ARISTA

Cloud Networking Solutions

Founded to be the pioneer and deliver software driven cloud networking solutions for large datacenter storage and computing environments.

ARMIS

IoT Security

The first agentless, enterprise-class security platform to address the new threat landscape of unmanaged and IoT devices, discover every managed, unmanaged, and IoT device on and off of your network, analyze device behavior to identify risks or attacks and protect your critical business information and systems.

AUTOMATION[®] ANYWHERE[®]

Robotic Process Automation (RPA)

Automation Anywhere empowers people whose ideas, thought and focus make the companies they work for great; deliver a sophisticated Intelligent Digital Workforce platform of digital workers, making work more humane by automating business processes and liberating people.

CHECK POINT[®]

Cyber Security Solutions

Protects customers from 5th generation cyber-attacks, defends enterprises' cloud, network and mobile device held information.

CLOUD SERVICE 360[®]

An integrated cloud-based infrastructure as a service (IaaS) and software as a service (SaaS)

A cloud based IT service managed by Hitachi Vantara and housed in a highly secure, reliable and scalable datacenter.

DARKTRACE

Network Behavior Analysis

An Enterprise Immune System technology (EIS) which detects unknown threats in real time using advanced machine learning and mathematics developed at the University of Cambridge to analyze every device, user and network.

digital.ai[®]

Intelligent Value Stream Management Platform

Uses value stream management as its cornerstone, combines innovative technologies in agile planning, application protection, software delivery, and artificial intelligence into a unified Value Stream Platform. Makes it possible to connect software development and delivery efforts to strategic business outcomes and create secure digital experiences customers trust.

f5

Multi-Cloud Security and Application Delivery

Powers applications from development through their entire life cycle, across any multi-cloud environment, enable enterprises to deliver differentiated, high-performing, and secure digital experiences.

HashiCorp

Infrastructure Automation for Multi-cloud Environments

HashiCorp was set up with the goal for revolutionizing data center management: application development, delivery, and maintenance, pioneered the creation and use of cloud infrastructure automation. It provides consistent workflows to provision, secure, connect, and run any infrastructure for any application.

Hitachi Vantara

Hitachi Virtual Storage Platform (VSP)

The only system that can centrally consolidate file, block and object data across mainframe and open systems environments as well as storage from other vendors.

Hitachi Content Platform (HCP)

An object storage solution that enables IT organizations and cloud service providers to store, share, sync, protect, preserve, analyze and retrieve file data from a single system.

KnowBe4

Integrated Security Awareness Training and Simulated Phishing Platform

KnowBe4 is the world's largest security awareness training and simulated phishing platform that helps company manage the ongoing problem of social engineering. Company can get on-demand, interactive, engaging training through the browser combined with unlimited simulated social engineering attacks through email, phone and text. It gives users access to the world's largest security awareness training library with always-fresh content.

Kodak alaris

Network Scanners

Automates the capture of information from documents and forms, and delivers reliable, retrievable information into your business applications.

LAIYE

Robotic Process Automation (RPA)

Laiye is a leading robotic process automation (RPA) and artificial intelligence (AI) provider, their integrated suite of AI-powered RPA, intelligent document processing (IDP) platform, and Chatbot solutions help businesses and people realise their full potential by optimizing the human-machine collaboration.

ManageEngine

IT Management Tools

ManageEngine has a proven track record in delivering effective IT management and IT security software to help you manage all your IT operations, including networks, servers, applications, service desk, Active Directory, security, desktops, and mobile devices.

MIRANTIS

Enterprise Container Platform

Mirantis helps organizations ship code faster on public and private clouds. With Lens and Docker Enterprise Container Cloud, Mirantis empowers a new breed of Kubernetes developers by removing infrastructure and operations complexity and providing one cohesive cloud experience for complete app and devops portability, a single pane of glass, and automated full-stack lifecycle management with continuous updates.

NetApp

Hybrid Cloud Data Management

NetApp is the data authority for hybrid cloud, provides a full range of hybrid cloud data services that simplify management of applications and data across cloud and on-premises environments to accelerate digital transformation.

PAESSLER

Producer of PRTG

Paessler is a renowned, global supplier specialised in monitoring solutions for businesses across all industries and all sizes, from SMB to large enterprises. It is applicable to organizations who value classic on-premises IT monitoring of the entire infrastructure, prefer to using the cloud application of Paessler or manage a large environment with huge amount of devices and special request.

paloalto[®]

Enterprise Security Platform

Safely enables all applications through granular use control and prevention of known and unknown cyber threats for all users on any device across any network.

Threat Intelligence Cloud

Expedites the response to threats by automatically detecting unknown malware and generating and distributing protections to subscribers, reducing attack volumes and manual processes.

PenPower

Technologies of Intelligent, Human-machine Interfaces

Devices with built-in smart human-machine interface technologies, greatly alleviate frustrating tasks involving computer interaction and data management. Well-known products included Handwriting Pad and PenPower.

RUCKUS

Smart WiFi Technology

Mobile Internet infrastructure, for indoor and outdoor applications, offers to carriers, service providers a solution resolving capacity and coverage challenges caused by increasing amount of traffic.

SailPoint

Identity and Access Management

A leader in identity governance, brings the Power of Identity™ to enterprise including compliance controls, provisioning password management, single sign-on and data access governance.

SECLORE

Enterprise Rights Management Solutions (ERMS)

Data-centric security solution across devices, networks, applications, and perimeters, ensures the complete access right to the files with track record on how data are used.

SingleStore

The World's Fastest Distributed SQL Database for Data-intensive Applications

SingleStore is the ideal all-in-one database for operational analytics and AI/ML-powered applications that requires fast data ingest, high performance queries and elastic scaling with familiar relational SQL.

SKYBOX[®]

Unified Security Posture Management Platform

Skybox is the only platform that collectively visualizes and analyzes hybrid and multi-cloud networks, providing full context and understanding of the attack surface.

SOPHOS

Next-Generation Firewall

An essential network firewall, plus protection for web and email gateways, laptops and mobile devices.

Security, Cloud Simplicity

Windows, Mac and mobile, together at last. Manage endpoint security and mobile devices from one unified cloud console.

Synology[®]

Enterprise and 5MB NAS

Centralizes data storage, simplifies data backup, share and sync files across different platforms, and access data on-the-go. DiskStation & RackStation are certified for Microsoft® Windows, helping businesses increase efficiency.

+ a b l e a u[®]

Visual Analytics Platform

Tableau offers a revolutionary new approach to business intelligence, you are able to quickly connect, visualize, and share data with a seamless experience from the PC to the iPad. Create and publish dashboards and share them with colleagues, partners, or customers with no programming skills required.

vembu

Backup & Disaster Recovery

A Leading Player in the Backup and Disaster Recovery Market

Vembu BDR Suite is a comprehensive backup and disaster recovery solution designed to protect the data across diverse IT environments that include virtual (VMware, Hyper-V), physical (Windows, Linux, Mac), cloud workloads (AWS, Azure) and SaaS applications (Office 365, G Suite).

VERACODE

Application Security

Delivers application security solutions and services today's software-driven world requires. Veracode's unified platform assesses and improves the security of applications from inception through production so that businesses can confidently innovate with the web and mobile applications they build, buy and assemble as well as the components they integrate into their environments.

VERITAS[®]

Data Protection and Business Continuity

Boosts application performance and streamlines data protection and management by NetBackup, Velocity, Backup Exec, Enterprise Vault, HyperScale, InfoScale and Data Insight.
