ACW

ACW Distribution (HK) Limited has a rich history dating back to its establishment in 1986. As a pioneer in the industry, we have consistently provided cutting-edge IT solutions in Hong Kong and Philippines. Over the years, we have built a strong reputation for integrating the market's "best-of-breed" products. We take pride in our ability to deliver these products to end-users through an extensive network of trained and certified channel partners in the region, establishing us as a trusted and reliable partner in the IT industry.

As of May 2025

Our Mission

As a long-standing and reputable IT value-added distributor based in Hong Kong, ACW Distribution (HK) Limited is dedicated to continuously bringing cutting-edge technology to our region and leveraging our expertise to deliver comprehensive services to our customers through 2-tiers model via our massive and strong partner network.

Our Vision

ACW Distribution (HK) Limited is committed to remaining at the forefront of the ever-changing IT landscape, providing the latest technology roadmap in response to the rapidly evolving business environment. We achieve this by proactively monitoring and addressing the ever-evolving needs of our customers.

Our Technical Expertise

We are all sales, marketing and technical professionals with truthful experience and qualified know-how.

Our Professional Services

You can find a wide range of services for our customers, from basic implementation services from us to professional consultation services. We also offer a comprehensive portfolio of technical training courses for you. Moreover, if standard training courses do not fit your company, we could customize for your requirements.

We offer various IT solutions including

- Business Solution
- Cybersecurity
- DevSecOps
- Digital Media Solution
- IT Operations & Collaboration
- Networking
- Storage, Data Security & Backup

Adobe

▶ **Digital Media Solution**

Adobe is a global leader in digital media and digital experience management solutions. Adobe's innovative products and services empower businesses to create, deliver, and optimize content and applications, transforming how companies engage with their customers.

Akamai

▶ **Cloud Computing, Security, Content Delivery (CDN)**

Akamai Connected Cloud is a massively distributed edge and cloud platform, puts apps and experiences closer to users and keeps threats farther away.

arctera

▶ **Data Compliance, Data Resilience and Data Protection**

Optimize data compliance, enhance data protection, and build data resilience with Arctera's AI-powered solutions for secure, efficient governance. Arctera helps organizations around the world thrive by ensuring they can trust, access, and illuminate their data from creation to retirement.

ARISTA

▶ **Cloud Networking Solutions**

Founded to be the pioneer and deliver software driven cloud networking solutions for large datacenter storage and computing environments.

ARMIS

▶ **IoT Security**

The first agentless, enterprise-class security platform to address the new threat landscape of unmanaged and IoT devices, discover every managed, unmanaged, and IoT device on and off of your network, analyze device behavior to identify risks or attacks and protect your critical business information and systems.

AUTOMATION ANYWHERE

▶ **Robotic Process Automation (RPA)**

Empowers people whose ideas, thought and focus make the companies they work for great; deliver a sophisticated Intelligent Digital Workforce platform of digital workers, making work more humane by automating business processes and liberating people.

CHECK POINT

▶ **Cyber Security Solutions**

Through the Check Point Infinity Platform, it provides cutting-edge solutions to defend against the most sophisticated cyber attacks. Their portfolio includes Check Point Harmony to secure the workforce, CloudGuard to secure the cloud, and Quantum to secure the network.

CLOUD SERVICE 360

▶ **An integrated cloud-based infrastructure as a service (IaaS) and software as a service (SaaS)**

A cloud-based IT service managed by Hitachi Vantara and housed in a highly secure, reliable and scalable datacentre.

COHESITY

▶ **AI-powered data security and management**

Cohesity gives you both data security and data management. Defend against ransomware with immutable backup, AI-based early threat detection, and rapid data.

Coremail

▶ **E-mail Solution Service**

Develops innovative products such as email system, enterprise mailbox, archiving system, delivery system, mail client, email gateway, security management center, email data leakage prevention system, etc.

CROWDSTRIKE

▶ **Cloud-native Security Platform**

Secures the most critical areas of risk – endpoints and cloud workloads, identity, and data. The CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

DaoCloud 道客

▶ **Cloud Native Tech Company**

A cloud native tech compay that provides Services, Enterprise and Voice that cover the whole lifecycle of application from dev to ops on public, private or hybrid environments.

digital.ai

▶ **Intelligent Value Stream Management Platform**

Uses value stream management as its cornerstone, combines innovative technologies in agile planning, application protection, software delivery, and artificial intelligence into a unified Value Stream Platform. Makes it possible to connect software development and delivery efforts to strategic business outcomes and create secure digital experiences customers trust.

eSignGlobal™ e簽寶

▶ **Electronic Signature and Contract Management**

A deeply engaged in the field of electronic signature service, providing comprehensive solutions such as secure and reliable identity authentication, electronic signature, intelligent performance, blockchain evidence preservation.

f5

▶ **Multi-Cloud Security and Application Delivery**

Powers applications from development through their entire life cycle, across any multi-cloud environment, enable enterprises to deliver differentiated, high-performing, and secure digital experiences.

FanRuan 帆軟
TRANSFORM DATA INTO POWER!

▶ **Business Intelligence and Analytics Platforms**

FanRuan is a professional big data BI and analytics platform supplier, specializes in the field of business intelligence and data analysis, and committed to providing global enterprises with a one-stop business intelligence solution.

Hitachi Vantara

▶ **Hitachi Virtual Storage Platform (VSP)**

The only system that can centrally consolidate file, block and object data across mainframe and open systems environments as well as storage from other vendors.

▶ **Hitachi Content Platform (HCP)**

An object storage solution that enables IT organizations and cloud service providers to store, share, sync, protect, preserve, analyze and retrieve file data from a single system.

IceWarp

▶ **Email Messaging and Collaboration**

IceWarp is a global email messaging, collaboration and unified communications solutions provider, offers a range of products and services that help enterprises with their communication and collaboration needs.

InfoCore 信核數據

▶ **Storage Virtualization and Data Protection Solutions**

Infocore is a provider that delivers secure and reliable Cloud Migration, Cloud Disaster Recovery, and Disaster Recovery Cloud Services.

极狐 GitLab 极狐

▶ **DevOps Platform**

JiHu GitLab provides a single data store, user interface, and permission model across the DevOps lifecycle, accelerating software development lifecycle through industry-leading project management, security, and compliance features.

KnowBe4

▶ **Integrated Security Awareness Training and Simulated Phishing Platform**

KnowBe4 is the world's largest security awareness training and simulated phishing platform that helps company manage the ongoing problem of social engineering.
Company can get on-demand, interactive, engaging training through the browser combined with unlimited simulated social engineering attacks through email, phone and text. It gives users access to the world's largest security awareness training library with always-fresh content.

Kodak alaris

▶ **Network Scanners**

Automates the capture of information from documents and forms, and delivers reliable, retrievable information into your business applications.

LAIYE 來也

Robotic Process Automation (RPA)

Laiye is a leading robotic process automation (RPA) and artificial intelligence (AI) provider, their integrated suite of AI-powered RPA, intelligent document processing (IDP) platform, and Chatbot solutions help businesses and people realise their full potential by optimizing the human-machine collaboration.

ManageEngine

IT Management Tools

ManageEngine has a proven track record in delivering effective IT management and IT security software to help you manage all your IT operations, including networks, servers, applications, service desk, Active Directory, security, desktops, and mobile devices.

MIRANTIS

Enterprise Container Platform

Mirantis helps organizations ship code faster on public and private clouds. With Lens and Docker Enterprise Container Cloud, Mirantis empowers a new breed of Kubernetes developers by removing infrastructure and operations complexity and providing one cohesive cloud experience for complete app and devops portability, a single pane of glass, and automated full-stack lifecycle management with continuous updates.

NetApp
Distributor Partner

Hybrid Cloud Data Management

The data authority for hybrid cloud, provides a full range of hybrid cloud data services that simplify management of applications and data across cloud and on-premises environments to accelerate digital transformation.

NSFOCUS 绿盟科技 綠盟科技

Iconic Internet and Application Security

A trusted vendor with Threat Intelligence, Anti-DDoS Protection, Web Application Firewall, Intrusion Prevention System, Vulnerability Management and Professional Security Assessment.

Outpost24

industry-leading Cybersecurity & Risk Management Solutions

Outpost24 is scaling fast as a global leader in Attack Surface and Identity Management, with the goal of securing its customers' ever-expanding digital attack surfaces. The Outpost24 platform lets security teams identify vulnerabilities, protect against external threats, and continuously monitor digital risk ·

PAESSLER
THE MONITORING EXPERTS

Producer of PRTG

A renowned, global supplier specialised in monitoring solutions for businesses across all industries and all sizes, from SMB to large enterprises. It is applicable to organizations who value classic on-premises IT monitoring of the entire infrastructure, prefer to using the cloud application of Paessler or manage a large environment with huge amount of devices and special request.

paloalto NETWORKS

Enterprise Security Platform

Safely enables all applications through granular use control and prevention of known and unknown cyber threats for all users on any device across any network.

Threat Intelligence Cloud

Expedites the response to threats by automatically detecting unknown malware and generating and distributing protections to subscribers, reducing attack volumes and manual processes.

PenPower 蒙恬科技

Technologies of Intelligent, Human-machine Interfaces

Devices with built-in smart human-machine interface technologies, greatly alleviate frustrating tasks involving computer interaction and data management. Well-known products included Handwriting Pad and PenPower.

RUCKUS COMMSCOPE

Smart WiFi Technology

Mobile Internet infrastructure, for indoor and outdoor applications, offers to carriers, service providers a solution resolving capacity and coverage challenges caused by ncreasing amount of traffic.

SailPoint

Identity and Access Management

A leader in identity governance, brings the Power of Identity™M to enterprise including compliance controls, provisioning password management, single sign-on and data access governance.

SECLORE

▶ **Enterprise Rights Management Solutions (ERMS)**

Data-centric security solution across devices, networks, applications, and perimeters, ensures the complete access right to the files with track record on how data are used.

SingleStore™

▶ **The World's Fastest Distributed SQL Database for Data-intensive Applications**

The ideal all-in-one database for operational analytics and AI/ML-powered applications that requires fast data ingest, high performance queries and elastic scaling with familiar relational SQL.

SOPHOS

▶ **Next-Generation Firewall**

An essential network firewall, plus protection fo web and email gateways, laptops and mobile devices.

Security, Cloud Simplicity

Windows, Mac and mobile, together at last. Manage endpoint security and mobile devices from one unified cloud console.

Synology®

▶ **Enterprise and SMB NAS**

Centralizes data storage, simplifies data backup, share and sync files across different platforms, and access data on-the-go. DiskStation & RackStation are certified for Microsoft® Windows, helping businesses increase efficiency.

tableau from Salesforce

▶ **Visual Analytics Platform**

Tableau offers a revolutionary new approach to Tableau offers a revolutionary new approach to connect, visualize, and share data with a seamless experience from the PC to the iPad. Create and publish dashboards and share them with colleagues, partners, or customers with no programming skills required.

ThreatBook 微步在線

▶ **Cyber Threat Detection and Response**

ThreatBook is a key provider of advanced cybersecurity solutions, offering high-fidelity threat detection, integrated response, and cloud/network/endpoint protection to empower enterprises. Recognized globally as a top provider of threat intelligence and security services.

ThriveDX For Enterprise

▶ **Digital Skills Training and Solutions**

ThriveDX SaaS, formerly known as Cybint Solutions, is the software as a service arm of ThriveDX, the global education company committed to transforming lives through digital skills training and solutions. ThriveDX SaaS partners with organizations and educational institutions to offer a diverse set of learning and security solutions, including career-accelerated bootcamps and security training for enterprises.

TOPSEC 天融信

▶ **Cybersecurity, Big data and Cloud service**

Topsec offers a range of cybersecurity products like NGFW, Intrusion Detection and Prevention System, Data Loss Prevention, Network Detection and Response, Endpoint Detection and Response System and Hyper-converged Management System.

Omada by tp-link

▶ **WiFi Products Provider**

TP-Link is a global provider of reliable networking devices and accessories, covering wireless routers and adapters, broadband access, powerline networking, range extender, SMB networking, 4G/3G WiFi, outdoor WiFi, and IP camera.

veeam

▶ **Data Protection and Ransomware Recovery**

The Veeam Data Platform delivers a single solution for cloud, virtual, physical, SaaS, and Kubernetes environments that gives IT and security leaders peace of mind that their apps and data are protected and always available.

VERACODE

▶ **Application Security**

Delivers application security solutions and services today's software-driven world requires. Veracode's unified platform assesses and improves the security of applications from inception through production so that businesses can confidently innovate with the web and mobile applications they build, buy and assemble as well as the components they integrate into their environments.

wood wing

▶ **Content and Information Management Solutions**

WoodWing excels in delivering top-tier content and information management solutions that drive results. Empower organizations to regain control over their publishing, document, digital asset, and quality management processes. Centralize digital assets to maintain brand consistency, ensure authorized access, and facilitate seamless collaboration.

神州云科
Yunke China   神州雲科

▶ **Digital Ecosystem Provider**

Yunke China is an Application Delivery Controller (ADC) solution provider, provides a wide range of features such as load-balancer, web application firewall (WAF), SSL/TLS offloading, DDoS protection, and remote access gateway.
